SUSTAINABLE ENERGY FOR ALL

ENERGY EFFICIENCY

ASSESS THE SITUATION

Decision Tree

Is there an up-to-date national energy efficiency policy or strategy?

- **Yes** → **Has energy efficiency been analyzed and modelled across relevant sectors (buildings, industry transport etc.)?**
  - **Yes** → **Review enabling framework and energy efficiency policy approaches by sectors**

Buildings

Regulations
- Mandatory Codes for existing buildings
- Mandatory Codes for new buildings
- Mandatory Standards

Information
- Voluntary building standards and guidelines
- Energy performance labels & Certifications
- Capacity building & skills development

Incentives
- Financial incentives
- Non-Financial incentives

Industry

Regulations
- Mandatory energy performance
- Mandatory standards

Information
- Energy management e.g. ISO 50001
- Measurement and verification
- Capacity building & skills development
- Awareness raising

Incentives
- Financial incentives
- Non-Financial incentives

Transport/Mobility

Regulations
- Fuel economy standards
- Mandatory testing and verification
- Zoning and standards

Information
- Fuel economy label
- Reporting system to track transport efficiency metrics
- Capacity building & skills development

Incentives
- Financial incentives
- Non-Financial incentives

Products/Appliances

Regulations
- Mandatory testing of products and appliances
- Minimum Energy Performance Standards (MEPS)
- Public procurement standards

Information
- Monitoring verification and enforcement (MVE)
- High energy performance standards and labels
- Capacity building & skills development
- Awareness raising

Incentives
- Financial incentives
- Non-Financial incentives

Utilities

Regulations
- Energy Efficiency Resource Standards

Information
- Energy Efficiency in generation
- District Energy
- Energy Efficiency in transmission and distribution networks
- Energy Efficiency in water & sanitation

Incentives
- Financial incentives
- Non-Financial incentives

Energy efficiency services

Regulations
- ESCOs / Super-ESCOs
- Green bonds, trust funds & carbon markets
- Bulk procurement

Information
- Pre-paid / smart meters
- Capacity building & awareness raising

Incentives
- Financial incentives
- Non-financial incentives

- **No** → **Develop / review national energy efficiency policy/strategy**
- **No** → **Carry out Integrated Energy Planning (IEP)**
  - Analyse energy consumption patterns across all sectors
  - Coordinate with ministries and authorities from various sectors (energy, industry, environment, climate change etc.)
  - Assign governmental and/or independent energy efficiency entity
  - Engage relevant non-governmental stakeholders in planning
  - Collect data and use tools to improve energy efficiency planning
  - Estimate potential of energy savings in each sector
  - Set targets on energy efficiency for priority sectors
