
Is there an up-to-date National Electrification Strategy (NES)?
YES:
Are stand-alone systems and mini-grids integrated in the National Electrification Strategy (NES)?
A - NO:
Develop or update National Electrification Strategy (NES)
(link to "B")
C - YES:
Review policy and regulatory framework to reflect NES
B - NO:
Carry out Integrated Electrification Planning (IEP)
D
Mini-grids
E Standalone systems
1. Define electricity access levels using the multi-tier framework
2. Establish a coordinating body empowered with high-level political buy-in
3. Engage experts and relevant stakeholders
4. Collect data and use tools (e.g. GIS) to support rural electrification planning
5. Estimate potential of mini-grids and off-grid systems (Link to "C")
1. Determine mini-grid ownership and operator model
1.1 Utility operator model
1.2 Private operator model
1.3 Community operator model
1.4 Public-private operator model
2. Establish MG policy instruments and regulations
2.1 Establish regulatory framework reflecting mini-grids operator models
2.2 Licensing, permitting, tendering, concession and contractual regulation
2.3 Uniform national electricity tariff vs. cost-reflective tariffs
2.4 Technical standards, quality of service regulations and reporting mechanisms
2.5 Customer protection and environmental policy and regulation
2.6. Regulations for interconnection with the national grid
3. Financing mini-grids
3.1 Public funding for mini-grids
3.2 Private funding for mini-grids
4 Strategies for community engagement and the promotion of productive use of electricity
5 Mainstreaming gender in mini-grids
1. Collaborate with the private sector to promote off-grid electrification
2. Technical quality standards and consumer protection
3 Introduce fiscal incentives and financial tools
4. Promote private investment
5. Promote local capacity building for deployment, installation and maintenance
6. Launch public information and awareness campaigns
7. Promote the development of local supply chains
8.Promote repair and recycling infrastructure and regulations
